

## B. Sewing the Pamphlet

12. Get string for sewing and measure 2 lengths (binding) + 3 inch extra. Cut & tie a knot ~1 inch in on one end & thread the other end. Get the wax and wax the thread.

13. Place pamphlet into binding (cover) and line up edges evenly. Open to center page of pamphlet and poke a hole in the center of the fold, poke 4 more holes, evenly, as shown. This will make it easier to get the needle through.

14. Now begin sewing the pamphlet as shown, turn after each set of stitches. Finish by coming up into the center hole & cut the thread. Leave enough to tie to the knotted end.

THE  
END!!
